

1. Architecture

- YML File: Contains the URLs
- Template.json File: Contains Headers and its expressions. The headers are:
 - HTTPS
 - HTTP Strict Transport Security (HSTS)
 - X-Content-Type-Options
 - Set Cookie
 - X-XSS-Protection
 - Access-Control-allow-origin
- Output JSON File: Contains the result

2. Future Modification

To add / modify Expressions :

- Modify template.JSON file accordingly
- Add / modify method in Inspect_Header_class
- Call the new method in Inspect_Header_Main.pv
